

REQUEST FOR ACTION (RFA) RESPONSE

GLAST LAT Project
Calorimeter Peer Review

17 – 18 March 2003

Action Item:	CAL – 004
Presentation Section:	Mechanical
Submitted by:	Jim Ryan

Request: Fastener locking - Locking feature on fasteners was stated to be epoxy on heads of screws, which is not a reliable way of locking fasteners. Consider uralane on threads or locking screws.

Reason / Comment: Epoxy on head of screws is adequate for torque striping but not for locking the fastener.

Response: 18 April 2003

NRL has agreed to implement uralane as a thread lock on all fasteners of the EM module. Torque striping of the fastener heads will still be implemented.
